

Outstanding Alumni: Dr. David B. Edmonds '73

David Edmonds graduated Magna Cum Laude from Birmingham Southern in 1977 with a B.A. in Chemistry. Then received his M.D. from UAB Medical School in 1981. Also earned degrees from an affiliated pediatric program in Phoenix from 1981-1984 as well as the University of Louisville 1984-1986.

What advice would you give students as they prepare for college and the challenges of our world today? Even if you are certain of your career goal, continue to learn as much as possible in unrelated fields; it is amazing how this information is useful through your lifetime.

How did attending Anniston Academy / The Donoho School make a difference in your life or your education? Due to excellent courses at Anniston Academy my freshman courses such as chemistry, math, and biology courses were only a review.

Current position, past work experience, licenses / certifications, and special awards or honors received: Lifetime board certification in Pediatrics from 1987. Sub board certification in Neonatal Perinatal Medicine 1989. Several years as America's Best Pediatrician and Physician. Retired September 2018 from Neonatal Specialists of Las Vegas after practicing there since 2009.

Additional comments: I always look back at my 4 years at Anniston Academy as time I will always treasure. I was so fortunate to have such great teachers and fellow students to enjoy the years with.
